India Infrastructure Intelligence Report

NIP 2025 | MoSPI Delays | Procurement & Governance

1. Key Statistics (Executive Dashboard)

₹111L Cr TOTAL NIP PIPELINE	**1,820** ACTIVE MEGA PROJECTS	**42.8%** PROJECTS DELAYED	**18.2%** AVG. COST OVERRUN

2. National Infrastructure Pipeline (NIP) Overview

The NIP for FY 2019-25 is a first-of-its-kind, whole-of-government exercise to provide world-class infrastructure. Energy (24%), Roads (19%), Urban (16%), and Railways (13%) amount to ~70% of the projected capital expenditure.

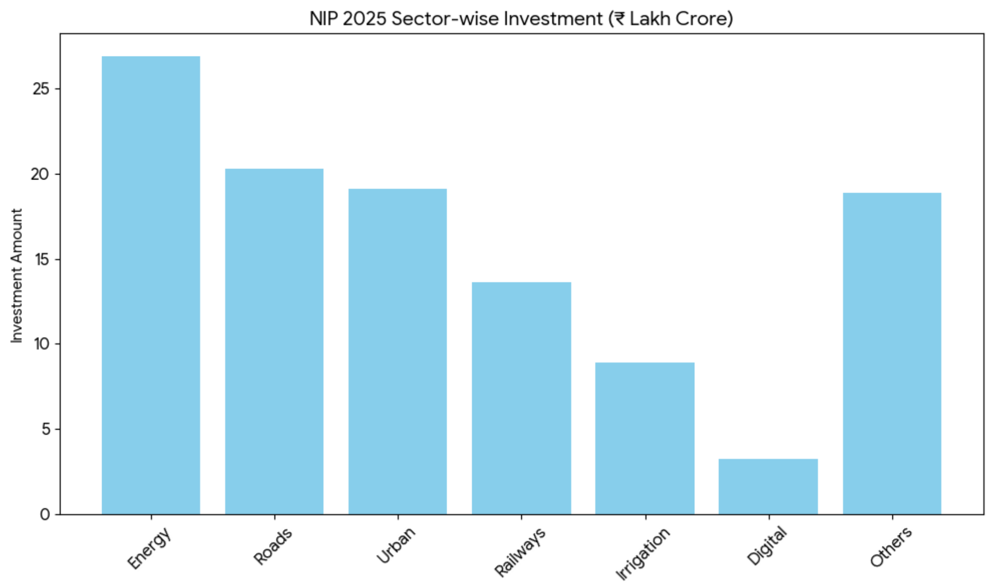

Figure 1: Sectoral breakdown of investment targets.

3. MoSPI Delay & Cost Overrun Report

Category	Count / Data	Impact
Delayed Projects	780 Projects	Average delay of 36-48 months
Cost Overrun	₹4.8 Lakh Crore	Total anticipated cost vs original
Top Reason	Land Acquisition	Primary hurdle for Road/Rail sectors

4. Governance & Procurement

- **Tendering:** NHAI and MoRTH have moved towards Hybrid Annuity Model (HAM) and EPC to mitigate developer risk.
- **Compliance:** CAG reports frequently highlight "Gold Plating" in urban infra and lack of detailed feasibility studies (DPR) as core causes for cost overruns.
- **Arbitration:** Over ₹70,000 Crore remains locked in arbitration for construction companies like HCC and L&T.

5. Key EPC Players

Top active contractors include L&T, Afcons, KNR, and Tata Projects. Blacklisting typically occurs via NHAI or MoRTH portals for performance default or safety violations.
